GLMVArchitecture

## LET US SERVE YOU

Your guests will dine in comfort and style with a project that is expertly designed by GLMV's Restaurant Division. Our team will design a project that includes skillful layout of the "back of house" functions, so that food can be properly and efficiently prepared, along with the dining area and points of sale. Inspired design enhances the brand image as well as the customer's dining experience. We are committed to building projects and relationships that last, and work diligently to provide a memorable and pleasant dining experience for your customers, clients, and their employees.

## Bringing Collaboration to the Table

Adaptability is key in multi-build prototype design. GLMV's process is tested and true, but adaptable to meet your specialized needs. Our multi-build prototype development process leans heavily on collaboration and guarantees your brand image will be industry leading with prototypes able to be adapted to different construction types, finishes, sites, and location requirements. From single proprietor to nationwide franchises, our comprehensive team approach guarantees your project is specialized to your budget and needs. Our national portfolio has allowed us to cultivate strong relationships with dedicated engineering consultants, vendors, and other resources across the country.
